

# The new Cue Sheet-O-Matic from CSS Music is here!

## With the new Cue Sheet-O-Matic CSS Music users can...

➔ *Start a new cue sheet and then finish it at a later time.*

No more having to build and submit your cue sheet in one shot. We call these updatable cue sheets, **“Active Cue Sheets”**.

➔ *Call up a submitted cue sheet and then use it as an editable duplicate.*

This **“Save As A New Cue Sheet”** feature can also be used to create a master template to work from Or, modify and newly submit an earlier cue sheet that might just need a few changes. *(This is also a great feature for submitting multiple edits of a show or film when necessary).*

➔ *Call up and print any cue sheet in CSS Music full-page style.*

Use the **“Click For Printable Version”** to see your data in our no-nonsense CSS Music style. Now when you call up your cue sheets they will look and print just the way you set them up.

Feel free to call us today at 800-468-6874 with any questions about the many new improvements made to Cue Sheet-O-Matic.
