

NOW! The Big, Bold Buy-Out Sound of...

POWERTRAX[®]

BROADCAST EDITION

The Powertrax[®] Broadcast Edition provides multiple :60 and :30 mix outs from the base thematics featured in the AV/Video Edition. Each mix out stands completely on its own, with its own beginning, middle and ending. Although certainly there is a "family" resemblance, each mix-out reflects a different feeling within the base selection-- great for coordinated spots, station imaging or promos. This edition can also often be used in AV/Video applications when you need to coordinate or reprise a thematic for a short segment without resorting to time consuming editing. To review the Powertrax[®] Broadcast Edition with Tele-trax use the codes to the left of each title, remembering that :60's always precede :30's in the playing order. Please refer to the accompanying Tele-trax brochure.
